SCM support matrix

SCM	Offering	Plan /Subscription	Deployment type	OtherDetails	URL	Altair support	Concerns with central-scm library for GA
Github	Github Standard	• Github Free • Github Pro • Github free for Organizations • Github Team	Cloud	• Managed by Github	• https://github.com	• **YES** • First available in Altair GA	None. Works as expected.
	GitHub Enterprise Cloud		Cloud	• Managed and hosted by Github • Enhanced security, compliance & deployment features over Github standard • Authentication with SAML single sign-on • Access provisioning with SAML or SCIM • GitHub Connect	• https://github.com	• **YES** • First available in Altair GA	The request URL while doing test connection is incorrect. Current GitHub Enterprise request URL(**INVALID**): https://github.com/api/v3/repos/sig-rnd-altair-testuser/TestProject GitHub Enterprise request URL(**VALID**): https://api.github.com/repos/sig-rnd-altair-testuser/TestProject
	GitHub Enterprise Server		Self Hosted	• Managed by the organization that purchased this subscription • GitHub Enterprise Server runs on customer's infrastructure and is governed by access and security controls that the organization define, such as firewalls, network policies, IAM, monitoring, and VPNs.	<variable>	• **NO**	Not supported for Altair GA
Gitlab	Gitlab SaaS	• Free • Premium • Ultimate	Cloud	• **GitLab SaaS** is hosted, managed, and administered by GitLab, Inc., with free and paid options for individuals and teams. • Feature by feature, GitLab SaaS and self-managed are mostly the same.	https://gitlab.com	• **YES** • First available in Altair GA	The SCMEnum being used is called GITLAB_SELF_HOSTED and this is confusing to the E2E team while doing the tests, because we are not supporting. **We need to rename the enum.**
	Gitlab self-managed	• Core • Premium • Ultimate	on-premises or cloud	• Install, administer, and maintain your own GitLab instance. • Feature by feature, GitLab SaaS and self-managed are mostly the same.	<variable>	• **NO**	Not supported for Altair GA
