

# Polaris UI Reports Page

Shows the same data set as the Dashboard page, but in a report format that can be output to CVS, PDF or Excel.

Table 1: Reports Page Interface

	
Fields 	Sortable columns for Application Name, Project Name, Issue Type and CWE ID. Also lists Location. 
Ellipse Icon	Provides menu access to download reports: <ul style="list-style-type: none"> <li>Image.</li> <li>CSV File.</li> <li>PDF File (1,000 lines maximum and customizable download).</li> <li>Excel File.</li> </ul>
Filters	Filter by Application, Project, Test Type, and Severity. Use the check boxes to make specific selections, or use the Include all button to select all checkboxes. Use toggle button in box to turn off  filters. Ellipse icon on filter panel allows you to use and set default filters.

Note: Use sortable columns and filters before you download to customize data.
