# Polaris UI Reports Page

Shows the same data set as the Dashboard page, but in a report format that can be output to CVS, PDF or Excel.

Table 1: Reports Page Interface

Fields	Sortable columns for Application Name, Project Name, Issue Type and CWE ID. Also lists Location.
Ellipse Icon	Provides menu access to download reports: • Image. • CSV File. • PDF File (1,000 lines maximum and customizable download). • Excel File.
Filters	Filter by Application, Project, Test Type, amd Severity. Use the check boxes to make specific selections, or use the Include all button to select all check-boxes. Use toggle button in box to turn off / on filters. Ellipse icon on filter panel allows you to use and set default filters.

Note: Use sortable columns and filters before you download to customize data.
